DIRECTIONS FOR APPLICATION

- Use this product for blends that include the legumes listed on the label; the blend can also include non-legume cover crops. The seed blend must be treated in accordance with the total weight of the seed blend.

- Label seed with the same expiration date as the product if intended for resale.

SLURRY METHOD APPLICATION

- Dampen the seed with non-chlorinated, clean, cool water at a rate of 500 mL (17 US fl oz) of water per 45.4 kg (100 lbs) of seed.
- Add appropriate amount of inoculant, 340 g (12 oz) per 100 lbs (45.7 kg) of seed, and mix dampened, and inoculant thoroughly until the seed is uniformly coated.
- This method should be done in a container outside the planter box.
- Allow 1 to 3 minutes for mixture to dry and then plant as soon as possible.

DRY APPLICATION METHOD

- This product can also be applied directly onto the seed. Mix seed and inoculant thoroughly until seed is uniformly coated. Layering seed and inoculant will aid in this process.
- Applying the inoculant dry is also recommended for seed that is pre-treated with fungicide. However, maximum seed adhesion will not be obtained by applying this product dry.

STORAGE/DISPOSAL RECOMMENDATIONS

- Store in a cool, dry place out of direct sunlight.
- Keep from freezing.
- Store between 40°F and 77°F (4°C and 25°C).
- Open package only when ready for use.
- Use before expiration date.
- Do not allow product or packaging to become wet, or exposed to high humidity.
- Do not store product in an area to be fumigated.
- Small amounts of product which cannot be used according to the label instruction may be disposed of in a landfill.
